Quick Connect System
The innovative Quick Connect System includes M12 Ultra-Lock™ connectors and cordsets for plug-and-play setup of single or multi-reader solutions.

X-Mode Technology
Symbol reconstruction provides decoding of damaged, poorly printed, or poorly aligned 1D bar codes to ensure high read rates and throughput.

High Performance
Aggressive decoding capabilities allow reliable reading of bar codes out to 37" (94 cm), at up to a 10" (25.4 cm) beam width.

Real-time Feedback
Visible LED indicators on the side of the scanner and a "good read" green flash projecting from the front window provide confirmation of the scanner's performance. The green flash is visible within a complete 360 degree radius from the scanner.

Ethernet Protocols
The QX-830 includes optional embedded Ethernet TCP/IP and EtherNet/IP for high speed communication.

Flexibility
The compact size of the QX-830 allows flexible positioning for a variety of applications.

Application Examples
- Any industrial environment from light to heavy duty
- Conveyor lines
- Packaging and sortation
- Electronics production
- Embedded within machinery
